Animals

Puffins

- Iceland has the most Puffins in the world.
- Iceland is one of those colonies but in spring time they come over here for nesting and Iceland is the breeding home for about 60 percent of the world's Atlantic puffins.
- Puffins can be seen in Iceland from early April until September each year.

Icelandic sheep/ Íslenska sauðkindur

- The Icelandic sheep is a short-finned sheep of Scandinavian origin. The Vikings brought Scandinavian sheep with them when they settled in Iceland more than 1,000 years ago. Icelandic sheep have short legs compared to other sheep breeds and are free of wool on their feet and face.
- The stock peaked in 1978 and there are now more than 480,000 sheep's in Iceland. In the 19th century. This led to diseases to which Icelandic sheep's are very susceptible.

Horses

The Icelandic horse is a breed of horse developed in Iceland. Although the horses are small, at times pony-sized, most registries for the Icelandic refer to it as a horse. Icelandic horses are long-lived. The horses eat mainly wild grass and herbs and fun fact, while most horses around the world like apples, carrots and sugar, Icelandic horses rather have some fresh wheat/grass.

Plants

Mountain avens /Holtasóley

Mountain avens is a rose plant that grows in the mountains and the arctic, the leaves are called rjúpnalauf. They are silky, green, and soft below and the stems are woody. Mountain avens forms wide or flat and the flowers are white with eight large petals.
